Eulalio I. Oaquiera

Nabua, Camarines Sur, Philippines

0994-582-4991 | oaquieraloipark@gmail.com

Professional Summary

Computer Science Instructor and Systems Developer with expertise in backend development, database systems, and full-stack web application development. Experienced in designing and deploying institutional platforms including barangay management systems, web-based examination systems, and administrative automation tools. Skilled in Python, PHP, MySQL, REST API development, and relational database design. Passionate about developing real-world software systems and integrating practical software engineering practices into Computer Science education.

Core Competencies

Programming & Development

- Python
- PHP
- C++
- HTML, CSS, JavaScript
- Flask Framework
- REST API Development
- CRUD System Development
- Backend Development
- MVC Architecture

Database System

- SQL & MySQL
- Relational Database Design
- Data Modeling & Normalization
- Query Optimization
- Database Implementation

Teaching & Academic Instruction

- Data Structures and Algorithms
- Algorithm Analysis and Complexity
- SQL and Database Systems
- Programming Instruction (C++ / Python/Html/CSS/JavaScript)
- Capstone Project Guidance

Professional Experience

University of Saint Anthony

San Miguel, Iriga City, Camarines Sur, Philippines

Computer Science Instructor *08/2024 - Present*

- Teach undergraduate courses including Data Structures and Algorithms, Algorithm Analysis and Complexity, Automata Theory, and Database Systems (SQL).
- Develop laboratory activities that allow students to implement real-world programming and database projects.
- Guide students in developing web-based systems and database applications as part of their coursework and projects.
- Integrate practical software engineering principles, algorithms, and system design concepts into classroom instruction.
- Supervise and mentor student projects involving database systems, web applications, and system automation tools.

Selected Software Projects

Barangay Management System (LAPSYSM – La Purisima System)

http://lapsysm.atwebpages.com/

A full-featured local government administrative platform designed to manage residents, certificate requests, complaints, and barangay operations.

Technologies: PHP, MySQL, Bootstrap 5, JavaScript, jQuery, DataTables

- Implemented **a** multi-stage approval workflow (Pending → Approved → Ready → Released) for efficient request processing.
- Developed a complaints management module for tracking disputes between residents and monitoring resolution status.

- Implemented role-based access control (SuperAdmin, Admin, Staff) to secure system operations.
- Integrated audit logging, database backup and restore functions, and system configuration tools for administrative control.

Web-Based Examination System

Developed a secure online platform that automates examination delivery and grading.

Technologies: Python (Flask), MySQL, HTML, CSS, JavaScript

- Implemented question bank management and timed examinations with automatic score computation.
- Developed role-based authentication for administrators, instructors, and students.
- Reduced manual grading workload by automating exam scoring and result generation.

Web-Based Tabulation System

Web-Based Tabulation System

Technologies: Python (Flask), MySQL, HTML, CSS, JavaScript

- Engineered a scoring and ranking platform for academic competitions and institutional events.
- Automated score computation and ranking generation in real time.
- Improved transparency and accuracy of event results.

Automated Bingo Event System

A digital Bingo system developed for institutional events.

Technologies: Python, JavaScript

- Designed and implemented a digital Bingo system for institutional events.
- Automated number generation and display logic to ensure fairness and randomness.
- Integrated real-time tracking of drawn numbers.
- Eliminated manual draw errors and improved event engagement.

Education

Camarines Sur Polytechnic Colleges

Nabua, Camarines Sur

Bachelor of Science in Computer Science

01/2020 - 01/2024

La Purisima National High School

Nabua, Camarines Sur

Senior High School

01/2018 - 01/2020

Technical Tools

- Python (Flask)
- PHP
- MySQL
- HTML, CSS, JavaScript
- Bootstrap
- Visual Studio Code
- Git / GitHub
- Microsoft Office
- Canva / Adobe Photoshop

Internship Experience

Programmer Intern

San Roque, Nabua, Camarines Sur

Bureau Of Fire Protection-Nabua

02/2024 - 05/2024

OJT Requirement / Developed for innovation

- Developed a Client Clearance Management System to digitize establishment monitoring processes.
- Implemented authentication modules and secure user sessions.
- Designed full CRUD functionalities for client records and clearance tracking.
- Integrated advanced search, sorting, and bulk import/export features.
- Improved operational efficiency by transitioning from manual to digital workflow.
- Technologies: Python (Flask), MySQL, HTML, CSS, JavaScript

Languages

English **Tagalog**
